

Award year	Outcome name	Award name	Award grade	Moderator of our school
2020	Creation and application of new special drugs for food animals	National Science and Technology Progress Award	The second prize	He Jiakang
2019	Large-scale chlorine dioxide preparation system and key technology and application of elemental chlorine free bleaching of pulp	State Technological Invention Award	The second prize	Wang Shuangfei
2018	Key technology of concrete-filled steel tube arch bridge over 500 meters	National Science and Technology Progress Award	The second prize	Zheng Jiilian
2018	Key technology and engineering application of waste concrete recycling	National Science and Technology Progress Award	The second prize	Chen Zongping
2018	Key technology and engineering application of heavy duty cement concrete pavement	National Science and Technology Progress Award	The second prize	Liang Junlin
2016	Key technologies and applications of recycling and ultra-low discharge of typical wastewater from papermaking and fermentation	National Science and Technology Progress Award	The second prize	Wang Shuangfei
2015	Key technology and engineering application of steel-concrete composite structure and hybrid structure system	National Science and Technology Progress Award	The second prize	Chen Zongping
2010	Construction and key technology integration of rotenone biopesticide industry system	National Science and Technology Progress Award	The second prize	Zeng Dongqiang
2007	Development and application of high activity α -acetylactate decarboxylase	National Science and Technology Progress Award	The second prize	Yellow sun wave
2005	Research on matching technology of RCC arch dam construction	National Science and Technology Progress Award	The second prize	Zhang Zhongqing
2000	Research and development of bovine in vitro fertilization technology	National Science and Technology Progress Award	The second prize	Lu Kehuan
